Effective Term and Year

Proposed Effective Term and Year

Fall 2025

Justification

Concentration Justification

The proposed major (BA in Sustainability and Environmental Studies) will offer students three distinct concentration options, enabling them to tailor their studies according to their intellectual interests and professional aspirations. The concentration areas include: Sustainable Development and Environmental Justice; Regenerative Food Systems; and Sustainable Natural Resources of the Western U.S.

This current proposal specifically focuses on the Sustainable Natural Resources of the Western U.S. concentration. This concentration enables students to gain knowledge needed to analyze and lead efforts to manage social-ecological systems in the unique contexts of the western United States. Such knowledge is particularly relevant to students who are seeking career pathways related to resource management in the broad region of which New Mexico is part.
