Justification

Proposed
Program Justification

During the transition to the new catalog structure and Kualii, the HMMHV minor lost some of the descriptive text outlining the minor for 2 student populations - (1) HMMHV minor requirements for students in the BA/MD Program and (2) HMMHV minor requirements for students outside of the BA/MD Program. We've added some of the lost text and edited the course requirements for each student population/minor requirements. Please see the 2022-2023 versus 2023-2024 catalog as reference for text and course requirements.

For the HMMHV minor requirements for students in the BA/MD Program, we also added a new course requirement of HMMHV 498: ST: SOM preparation. Although the Program already had the HMMHV 498 course to utilize, it took the Program many years to investigate what was needed to better bridge from undergraduate to SOM curriculum, pilot a summer program with improvements and ultimately arrive at current phase of creating an undergraduate course in the spring of 4th year.

Program Description

The Health, Medicine and Human Values (HMHV) minor is a great opportunity for all students looking for a well-defined pre-health undergraduate curriculum. The minor is open to all undergraduates majoring in Arts & Sciences and University College degrees but is a requirement of BA/MD students who choose Option I: Arts & Sciences majors.

It offers students an interdisciplinary portfolio of core courses and a selection of complementary electives designed to prepare students interested in pursuing a variety of careers in health and medicine. The HMHV minor provides all students interested in health professions such as public health, medicine, and health policy with a strong foundation in broad range of health care issues (including social determinants, disparities, cultural competence, and medical ethics) relevant to the specific circumstances of New Mexico, as well as the national and global context of medicine and health today. The HMHV minor makes available courses developed within and taught by dynamic faculty specialists from the Combined BA/MD Degree Program.

A. Minor Requirements for students in the B.A./M.D. Program:

BA/MD students enrolled in Option I who complete HMHV 1110, 2110, 2993, 301, 310, 350, 398, 401, 450, and 498 are awarded a minor in Health, Medicine and Human Values.

BA/MD students enrolled in Options II and III who complete all requirements for those options receive a major in Health, Medicine and Human Values; there is no minor requirement for either Option II or III.

If a student leaves the BA/MD Program prior to completing the undergraduate degree will work with the HMHV minor advisor to determine how they may complete the minor after their transition.

B. Minor Requirements for students outside the BA/MD Program:

Students who complete 12 credit hours of HMHV seminars may receive a minor in Health, Medicine and Human Values by completing another 9 credit hours of distribution requirements from the list of courses below. At least three credit hours of the distribution requirements must be from a 400-level course. Students must achieve a cumulative GPA of 3.00 or above in all 21 credit hours submitted for the minor. Fifteen of the 21 credit hours for the minor must be upper-division. Some of the courses below require prerequisites, so students must plan accordingly.

Program Description

The Health, Medicine and Human Values (HMHV) minor is a great opportunity for all students looking for a well-defined pre-health undergraduate curriculum. It offers students an interdisciplinary portfolio of core courses and a selection of complementary electives designed to prepare students interested in pursuing a variety of careers in health and medicine. The HMHV minor provides all students interested in health professions such as public health, medicine, and health policy with a strong foundation in broad range of health care issues (including social determinants, disparities, cultural competence, and medical ethics) relevant to the specific circumstances of New Mexico, as well as the national and global context of medicine and health today. The HMHV minor makes available courses developed within and taught by dynamic faculty specialists from the Combined BA/MD Degree Program. The minor is open to all undergraduates majoring in Arts & Sciences and University College degrees. HMHV courses for the minor are offered in the Spring semester of each academic year, except for HMHV 1110 in the fall, and do not have pre-requisites.

Students who complete 12 hours of Health, Medicine, and Human Values (HMHV) seminars may receive a minor in Health, Medicine, and Human Values by completing another 9 hours of distribution requirements from the list of courses below. Students must achieve a cumulative GPA of 3.00 or above in all 21 hours submitted for the HMHV minor. 15 of the 21 hours for the minor must be upper division (300/400 level course).
