Medical Imaging

Program Level
Graduate

Concentration Requirements

- Complete all of the following
  - Complete the following:
    - MPHY516 - Fundamentals of Medical Imaging (3)
    - MPHY518 - Advanced Medical Imaging (3)
    - MPHY527 - Radiation Biology for Engineers and Scientists (3)
    - RADS480 - Human Cross Sectional Anatomy (3)
  - Complete at least 2 of the following:
    - BIOM509 - Principles of Neurobiology (3)
    - BIOM510 - Physiology (3)
    - BIOM514 - Immunobiology (3)
    - BIOM515 - Cancer Biology (3)
    - PHRM576 - Molecular and Cellular Pharmacology (3)
  - Earn at least 3 credits from the following:
    - MPHY505 - Selected Topics in Medical Physics (1 - 5)

- Earn at least 9 credits from the following:
    - ECE533 - Digital Image Processing (3)
    - ECE539 - Digital Signal Processing (3)

Grand Total Credits: 30

Concentration Description

The concentration in Medical Imaging will lead to the M.S. or Ph.D. degree, with the majority of students obtaining a Ph.D. Pre-doctoral requisites of the program are one year of BSGP core curriculum followed by an individualized program of upper-level courses and scientific research in the laboratory of a BSGP-approved faculty mentor.

Medical Imaging concentration students conduct research studies under the mentorship of a faculty member or an affiliated faculty member in the Department of Radiologic Sciences, an academic unit of the University of New Mexico School of Medicine. The Radiologic Sciences department is dedicated to providing excellent patient care to the people of New Mexico and the Southwest as well as to the comprehensive education and training of radiologists, medical physicists, technologists, and research scientists in diagnostic imaging. To this end, Radiologic Sciences strives to improve patient care by optimizing image acquisition techniques and developing new imaging methods that increase sensitivity and specificity for disease detection and progression, and the Department is focused on innovating, collaborating, and translating research from bench to bedside. Research laboratories of faculty members and affiliated faculty members of Radiology encompass all modalities of medical imaging with a specific focus on cancer imaging, neurological imaging, substance abuse and cognition/learning, and quantitative imaging techniques in preclinical and clinical disease models.
