Justification

Proposed
Concentration Justification

The Department of Economics recently requested changes to its undergraduate curriculum that affect this concentration or program. Specifically, we have proposed a new course, ECON 495: Topics in Applications of Economics, to replace two specialized and obsolete 400-level topics courses (ECON 442 and ECON 466).

The proposed changes below align with the relevant changes above only. No other requirements are changed. For more information, please review the associated inactivation forms for the courses listed above as well as the new course form for ECON 495: Topics in Applications of Economics - Under Review.

Note: We've been in communication with the LAS Department. They are aware of the proposed change. (There is no file upload option to show our conversation).
