## **Faculty and Budgetary Load Implications**

### **Health Systems Services and Policy Concentration**

This concentration has existed in an informal format since the inception of the Public Health Program in 1994. The Public Health Program termed this concentration the “Generalist” concentration. We are now submitting a form C for the development of this concentration. Courses in the Health Systems, Services, and Policy Concentration have been taught by existing faculty within their current teaching loads. Therefore, all courses currently exist within the new concentration.

## Catalog Copy:

### Health Systems, Services, and Policy Concentration

The concentration in Health Systems, Services, and Policy will provide students with the knowledge and skills necessary to analyze health systems, public health and health care services and programs, and related governmental and non-governmental policies. Students will develop the capacity to analyze and develop interventions and health policies at local, national and global levels. The goal of the concentration is to prepare students to work in health organizations and policy arenas to improve population health and decrease health inequities.

### Requirements

In addition to the MPH core curriculum the Health Systems, Services, and Policy Concentration requires:

- The completion of 21 credits in graduate-level courses in health policy, health care systems, community health, or epidemiology as outlined below;
- Completion of a practical field experience (PH 598 - Public Health Practicum) in policy, public health or health care service settings; and
- Demonstration of competencies in integrating system, service, and policy perspectives through the culminating experience.

In addition, for students in this concentration, the chair of their culminating experience committee must be a core faculty member of the concentration.

	Required Courses	Total Units 15
