☐ **Does this change affect other departmental program/branch campuses? If yes, indicate below.**

Reason(s) for Request (enter text below or upload a doc/pdf file)

Quantum Information Science (QIS) is a rapidly growing interdisciplinary field, and there is a surge in demand for a quantum-ready workforce, trained in the science and techniques of QIS. Graduating PhD students are highly sought after as researchers in academia, national laboratories, and industry. In order to address this need requires an interdisciplinary curriculum, and our proposed program addresses this need using a flexible approach that fits within our current PhD offering.

Upload a document that includes justification for the program, impact on long-range planning, detailed budget analysis and faculty workload implications. (upload a doc/pdf file)
